

The Birth of the Industrial Revolution

Use the boxes below to note down two (or more!) reasons why each factor was important in the industrial revolution. When you have made notes, give each factor a number based on its importance in your opinion. Give the **most important** a '1' and order the rest down to '6', which is the **least important**.

Population Boom <input data-bbox="667 353 785 465" type="text"/>	Agriculture <input data-bbox="1391 353 1509 465" type="text"/>
Factories <input data-bbox="667 748 785 860" type="text"/>	Power <input data-bbox="1391 748 1509 860" type="text"/>
Transport <input data-bbox="667 1079 785 1191" type="text"/>	Empire <input data-bbox="1391 1079 1509 1191" type="text"/>

Now that you have chosen your order of importance, **explain** why you have made your choices for 1 and 6.
